Head Teacher: Mrs EB Davies

25th September 2020

Dear Parents and Carers,

I am writing to let you know that this week we have closed one of our classes due to a very probable case of COVID-19 in school. We have a parent who has tested positive whose child is presenting with the same symptoms, but the child's test result has come back inconclusive. On the advice of the DfE this class will remain closed for the 14-day isolation period.

Our remote learning provision is fully set up and any children who need to stay at home due to a class closure will be able to access this.

The rest of this letter is information we are asked to provide to you from Public Health England.

What to do if your child develops symptoms of COVID-19

If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared.

All other household members who remain well must stay at home and not leave the house for 14 days.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- A high temperature (37.8° or above)
- A new, continuous cough (coughing a lot for more than an hour or 3 or more coughing episodes in 24 hours)
- A loss of or change to sense of taste or smell

For most people, coronavirus (COVID-19) will be a mild illness.

If your child or anyone in the household does develop symptoms, you can seek advice from NHS 111 at:

<https://www.nhs.uk/conditions/coronavirus-covid-19/symptoms/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19.

Do

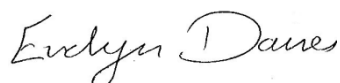

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Further Information

Further Information Further information is available at:
